Summary

This course is first time spine operative course for Myanmar. It is well integrated program for our spine development. 12 international faculties were involved for this successful event.

There were 48 local and 18 international participants. During these three days course, total 9 patients were operated for surgical demonstration and interactive discussion. No one got intraoperative and postoperative problem. All patients satisfy with their excellent result. 5 patients were operated with instrumentation and 4 patients were non instrumentation.

Audio visual connection and HD recording camera were set up by Myanmar Orthopaedic Society budget.

Registration fees were 50 US\$ for local and 200 US\$ for international participants. Most of the participants actively participated in discussion and operation.

From this course, we had learnt a lot of theoretical knowledge and surgical technology, in addition, it promote our relationship with expert spine surgeons from APSS.
